

Color + Typography

Reference-led. Professional first. Playful second.

Learn skills.
that shape tomorrow.

Color creates energy. Typography creates trust.

What the references consistently do well

A shared visual language emerges across the six supplied references.

COLOR LANGUAGE

Warm neutral canvases reduce the sterile feel of pure-white tech brands. High-chroma lime/chartreuse creates energy, while lavender and sky add youthfulness. A near-black anchor keeps the palette credible and gives the brights something to push against.

Warm bases

Cream and white keep the system calm and premium.

Signal color

Lime is memorable because it is controlled.

Dark anchor

Near-black provides authority and contrast.

Soft secondaries

Lavender and sky add curiosity without chaos.

REFERENCE CUES

TYPE CUES

Large, geometric grotesk

Short headlines, strong weight changes and compact line breaks.

Friendly body copy

Readable, neutral, never cartoonish.

The common visual grammar

Carry the relationship between color, contrast and type, not the original interfaces.

01

Anchor

Warm neutral + deep ink creates a premium base.
Start calm, then add energy.

02

Signal

Lime acts as the signature attention color. Use it to
mark what matters.

03

Air

Lavender and sky soften high contrast. Keep them
supportive, not dominant.

04

Voice

Bold grotesk headings + neutral body copy create
confidence with approachability.

Professional first.
Playful second.

The personality comes from controlled scale, weight and color interaction, not decorative noise.

Energy without losing institutional trust

The system behaves like the references, but with tighter contrast discipline and fewer arbitrary colors.

WHY IT WORKS

AUDIENCE	EFFECT
Students	Lime and lavender feel current, energetic and creative without childish rainbow behavior.
Parents	Deep ink and warm neutrals communicate stability, seriousness and perceived quality.
Teachers	Neutral text and semantic colors keep the system practical and easy to parse.
School leaders	The dark anchor and restrained palette signal an established, credible product.

CORE PRINCIPLE

Bright color is a signal. Neutral color is the environment.

Production palette

Compact by design. Every color has a job.

Reference extraction note

The references cluster around chartreuse/lime, lilac/periwinkle and sky blue, all grounded by near-black and warm whites. THEORLY preserves those relationships, but darkens the anchor and warms the neutral for maturity and readability.

What each family is for

Role-based usage stops the palette from becoming confetti.

PRIMARY

Lime Signal

Recognition, highlights, high-priority moments and achievement.

ANCHOR

Deep Ink

Headings, primary text, dark fields and trust-heavy communication.

SECONDARY

Lavender

Learning, experimentation, creative emphasis and softer differentiation.

SECONDARY

Sky

Information, exploration, links and softer technical emphasis.

NEUTRAL

Warm Cream + Paper

Primary canvas and surfaces. Use Warm Cream for brand warmth; Paper when extra visual cleanliness is useful.

RECOMMENDED VISUAL MIX

Simple rules. Fewer mistakes.

DO

01

Use lime as a signal, not a default background.

02

Keep headings primarily in Deep Ink.

03

Pair bright colors with neutral space.

04

Use lavender/sky to create meaningful variety.

05

Let semantic colors communicate state, not personality.

DON'T

01

Stack lime + lavender + sky at full saturation everywhere.

02

Use light secondary colors for long body text.

03

Use pure black when Deep Ink is available.

04

Make every heading a different accent color.

05

Use semantic colors as decoration.

ACCESSIBILITY-FIRST RULE

When color and readability conflict, readability wins.

The references are expressive because they control contrast. THEORLY should do the same rather than compensating for weak contrast with extra decoration.

Contrast is part of the identity

Approved pairings below use WCAG-style contrast logic. Values are calculated from the HEX colors in this document.

Deep Ink / Warm Cream

14.3:1

recommended pairing

Deep Ink / Lime

12.7:1

recommended pairing

Deep Ink / Lavender

7.5:1

recommended pairing

Deep Ink / Sky

recommended pairing

White / Error

5.0:1

recommended pairing

White / Deep Ink

15.8:1

recommended pairing

Deep Ink / Success

7.4:1

recommended pairing

PRACTICAL GUIDANCE

Use Deep Ink for body and heading text on light backgrounds. Use Deep Ink text on Lime, Lavender, Sky and Success fills. For Error, use white only with the specified darker red value. Avoid lighter reds for normal-size white text.

Do not rely on color alone

State communication should remain understandable through wording and typographic emphasis even when color is removed.

Type is the personality engine

The references use typography as their main expressive device. THEORLY should do the same.

BOLD but controlled.

The typographic language is a modern grotesk: strong geometry, large weight changes, tight headline rhythm and highly legible body copy. THEORLY preserves that confidence while avoiding novelty fonts.

Geometric clarity

Headlines should feel structured and clean, not quirky.

Weight contrast

Use Semibold, Bold and Black strategically to create emphasis.

Readable body

Keep body copy neutral, open and comfortable at small sizes.

Compact hierarchy

Fewer levels, stronger differences. Humans have limited patience.

Inter is the production fit

Inter closely matches the reference tone and keeps THEORLY credible across student and school contexts.

HEADLINE SPECIMEN

Learn what
the future feels like.

INTER DISPLAY / BOLD

ROLE	FAMILY	WEIGHTS	REASON
Headline	Inter Display	700 / 900	Geometric, dense and modern. Closest match to the supplied references.
Body	Inter	400 / 500	Neutral, highly legible and dependable at small sizes.
Labels	Inter	500 / 600	Clear at compact sizes without becoming aggressive.

WHY NOT A PLAYFUL DISPLAY FONT?

The references already create play through scale, color and graphic expression. Adding a novelty typeface would push THEORLY toward toy-like branding and weaken trust with parents, teachers and schools.

Compact hierarchy. Deliberate jumps.

Use this as the core type scale. Keep the relationships stable even when exact sizes change by breakpoint.

STYLE	FAMILY	SIZE / LINE	TRACKING	USAGE
Display	Inter Display Black	64 / 1.00	-0.035em	Hero statements
H1	Inter Display Bold	48 / 1.05	-0.030em	Primary page heading
H2	Inter Display Bold	36 / 1.10	-0.025em	Major section heading
H3	Inter Display SemiBold	28 / 1.15	-0.020em	Subsection heading
H4	Inter SemiBold	22 / 1.20	-0.015em	Compact content heading
Body Large	Inter Regular	18 / 1.55	0	Intro copy
Body	Inter Regular	16 / 1.50	0	Default body
Body Small	Inter Regular	14 / 1.45	0	Dense support copy
Caption	Inter Medium	12 / 1.35	0.01em	Metadata
Label	Inter SemiBold	11 / 1.20	0.02em	Short labels
Navigation	Inter Medium	14 / 1.20	0	Navigation text
Button	Inter SemiBold	14 / 1.10	0	Action labels

Consistency is the invisible premium

Weights

Use 400, 500, 600, 700 and 900 only. Avoid unnecessary weight soup.

Case

Use sentence case for most copy. Reserve ALL CAPS for short labels.

Spacing

Headings may use slight negative tracking. Body text stays at default tracking.

Emphasis

Prefer weight and one accent color over italics or underlines.

Numbers

Use tabular figures when comparing values; otherwise use standard proportional figures.

AVOID

01

Decorative or
handwriting fonts.

02

Long paragraphs
in bold.

03

Full sentences in
ALL CAPS.

04

Many accent
colors inside one
headline.

05

Tiny text used to
compensate for
weak hierarchy.

Controlled tension, not childishness

Professional first. Playful second.

PROFESSIONAL

PLAYFUL

Target balance: approximately 70% structural clarity / 30% expressive contrast.

PRO

Clarity
Consistency

Readable body copy and disciplined hierarchy.

PLAY

Curiosity
Energy

One unexpected color moment or scale jump.

HOW PLAYFULNESS IS CREATED

Not with cartoon fonts. Not with rainbow typography. Use big-to-small type jumps, a single bright highlight, short headlines and occasional lavender/sky emphasis. The brand stays credible because the underlying type system never changes.

Approved pairings

One dominant text color per block, one accent maximum.

LIGHT / CORE

Learn skills.
that shape tomorrow.

LIME / SIGNAL

Build.
with confidence.

LAVENDER / EXPLORE

Explore.
what's possible.

SKY / INFORMATION

Learn faster.
Understand deeper.

INK / AUTHORITY

Future skills.
for real life.

PAPER / CALM

Practice.
Then prove it.

Rule of thumb

Bright color should be the emphasis, never the entire conversation.

Developer-ready tokens

Scope intentionally limited to color and typography.

Primary + semantic color values

Success #20C978 / Warning #F6C744 / Error #C53D3D / Info #4D8FEA

The system in one sentence

**Warm neutrals + deep ink + signal lime,
supported by lavender and sky,
expressed through a confident grotesk.**

01

Anchor first

Deep Ink and warm neutrals create trust.

02

Signal, don't flood

Lime earns attention because it is controlled.

03

Keep color meaningful

Lavender and sky support meaning, not decoration.

04

Let type carry personality

Inter Display creates the confident, modern voice.

05

Readable wins

Accessibility is part of the brand, not an afterthought.
